FOR OUTDOOR USE ONLY

CAUTION

This stove is for OUTDOOR USE ONLY. Never use this stove in a tent, car, house, or inside any enclosed area. This stove produces carbon monoxide, which is poisonous and has no odor. This stove can easily ignite nearby combustible materials and flammable liquids or vapors. If you use this stove in an enclosed area you can be killed or seriously burned.

Keep stove and canopy away from other heat sources. Never use any kind of windscreen. Never use cookware or an Outback Oven™ with a diameter larger than 8 inches (20.3 cm). If you expose the stove to high heat, it will explode and you can be killed or seriously burned.

Never let children use this stove. Keep children at least 10 feet (3+ meters) away from the stove and cooking area, and supervise them at all times.

READ, UNDERSTAND, AND FOLLOW ALL instructions and warnings in this manual before using this stove. Failure to follow warnings and instructions can result in death, serious burns or other injury, and property damage.

FOR YOUR SAFETY

1. Do not attempt to use this stove (i) before reading and fully understanding this Instruction Manual; (ii) if you are not prepared or comfortable attending to a burning and/or hot stove at all times; (iii) if you observe leaking fuel, or (iv) if you observe any condition with the stove system or in the surrounding environment that would make operation of an open flamed device dangerous. Failure to follow these directions can cause an unsafe situation leading to fire, burns, serious injury or death.

This stove is designed for the caretaker (e.g., not within enclosed spaces of any kind, e.g., tents, buildings or other structures) boiling of water or cooking of food only—not use it for any other purpose. Use of stove within any enclosed space, or for a purpose other than boiling water or cooking food can cause burns, serious injury or death.

Do not disassemble stove beyond what is described in these instructions. Do not modify stove. Disassembly or modification of stove in any manner not consistent with these instructions voids warranty and can result in an unsafe situation where fire, burns, serious injury or death can occur.

Do not use stove if parts are missing or broken, or with replacement parts not specific to your stove model. Use of stove with missing or broken parts, or with replacement parts not specific to your stove model, can result in an unsafe situation where fire, burns, serious injury or death can occur.

Carbon Monoxide Hazard

There are serious hazards associated with using this stove and fuel. Accident, fire, explosion, and misuse can cause death, serious burns, and property damage. You are responsible for your own safety and the safety of those in your group. Please use good judgment.

WARNING

Carbon Monoxide, Fire & Explosion Hazard

Read and understand this entire manual carefully before assembling or using the stove. Failure to follow warnings and instructions can result in death, serious burns or other injury, and property damage.

General Safety Information

To avoid being killed or seriously injured, READ, UNDERSTAND, AND FOLLOW ALL warnings and instructions in this manual before you use this stove. This stove is a lightweight, compact device made for cooking outdoors. Please consult with your local outdoor retailer to learn more about cooking outdoors. Seek qualified instruction before you venture outdoors. You are responsible for your own safety and the safety of those in your group. This manual is not intended to replace your judgment.

Fuel Canister Safety

This stove uses a liquid pressurized gas (LPG) canister that is highly flammable and explosive. Use only MSR® premium blend canister fuel, 70 Butane/30 Propane or 80 Butane/20 Propane max, certified to EN 417 (a source or 8 oz [227 g]). Do not attempt to fit other types of gas canisters. For any fuel canister, follow this safety information:

- Listen and smell for leaking gas. Leaking gas is a serious hazard. LPG is invisible and odorless, and strong odorant additives can fade over time. Leaks are not always detectable by smell. Do not use this stove if it is leaking, damaged, or does not operate properly.
- Check that the stove and fuel canister connection is secure and tight. If the connection does not leak on heat or secure, or if you hear or smell leaking gas, do not use stove or canister. Move stove to a well-ventilated area away from any ignition source to locate and stop the leak. Only check for leaks outdoors using soapy water. Do not try to detect leaks using a flame.
- Only change the canister outside and away from people.
- Never use fuel canisters larger than 8 ounces (227 g) or more than 4 inches (10 cm) in height, because oversized canisters increase stove instability.
- Use only MSR® Valve Body and MSR® Pot Supports. Never use stove if seals are damaged or worn.
- Keep stove and fuel canister away from other heat sources. If you expose the fuel canister to high heat, the canister will explode or leak and you can be killed or seriously burned.
- Follow all warnings on fuel canister regarding use and storage.

Know Your MSR® PocketRocket™ Stove

Please familiarize yourself with the parts of your PocketRocket Stove and the following instructions before connecting the stove to its fuel canister. Never use this stove in any other way than is described in the following instructions.

PocketRocket™ Stove Operating Instructions

1. Connect Stove and Canister

- Unfold Flame Adjuster.
- Close Flame Adjuster Valve.
- Finger-tighten stove onto the top of the canister until connection is secure.

2. Set Up Stove

- 1. Close cooking area of combustible materials and flammable liquids or vapors.
- 2. Place stove assembly on a solid, stable, even surface to ensure stability.
- 3. Open Pot Supports.

3. Turn Stove On

- 1. Hold a lit match over the edge of the Burner Head.
- 2. Open Flame Adjuster Valve (3/4 turn) to release and ignite fuel.
- 3. Turn Flame Adjuster Valve to desired flame setting.

4. Use Stove to Cook

- 1. Add food or liquid to cookware.
- 2. Place cookware onto the center of the stove.
- 3. Turn Flame Adjuster Valve to adjust heat.

5. Turn Stove Off

- 1. Close Flame Adjuster Valve when cooking is done.
- 2. After flames are out, wait 5 minutes for stove to cool.
- 3. Fold Flame Adjuster.
- 5. Move stove assembly away from any ignition sources and unsecured canister.

Troubleshooting

Poor Performance Cause Solution

Diminished flames Low fuel Replace canister

Stove does not light Cold canister Swap canisters

Windy conditions Shelter stove behind a rock/natural barrier

Empty canister Replace canister

Always disconnect stove from canister before storing it. Follow to disconnect stove from canister before storing may cause fuel to leak and cause fire, burns, severe injury or death. Always store fuel canisters in a well-ventilated location away from any possible heat or ignition source such as: water heaters, stoves, pilot lights, or furnaces; or where temperatures exceed 120°F (49°C). Storing fuel canisters near any heat or ignition source or where temperatures exceed 120°F (49°C), can result in the canister exploding and causing fire, burns, severe injury or death.
